

Ocelloids Monitoring Tool

3 - DeFi Monitoring

Submitted by: SO/DA Zone

1 Jun 2026

Overview	1
Deliverables	2

Overview

This milestone expands the platform's DeFi monitoring and analytics capabilities with support for Hydration, Moonbeam and Bifrost. New data ingestion pipelines index DEX liquidity pools, money markets reserves, lending activity, trading activity and liquid staking activity across major protocols.

The platform also introduces alerting templates for money market health metrics and DEX liquidity pool TVL. The Console UI has been enhanced with TVL and volume analytics, money market metrics and liquid staking analytics, providing users with improved visibility into protocol activity and risk.

Deliverables

Tasks	Deliverables	Links
3.a Documentation	User guides, documentation and support materials	Hyperion README
		Hyperion API Docs
		User guide
3.1 Hydration	We added indexing of Hydration pool reserves and trading volume (router swaps and DCA) in Omnipool, Stableswaps, AAVE pools, and selected isolated pools. We are also indexing money market and HSM reserves, and lending volume.	Implementation
3.2 Moonbeam	We added indexing of Stellaswap DEX (Algebra v4) pool reserves and trading volume, as well as Moonwell money market reserves and lending volume.	Implementation
3.3 Bifrost	We added indexing of Bifrost SLP V2 liquid staking TVL and mint/redeem volumes.	Implementation
3.3 DeFi Alerting Templates	New templates supported: <ul style="list-style-type: none"> • Money market health: allows configuration of alerts on key money market health factors like solvency and utilization rate. • DEX liquidity pool TVL: allows configuration of alerts on unusual TVL changes. 	Implementation
3.4 Console UI	Updated Console UI now includes for Hydration and Moonbeam: <ul style="list-style-type: none"> • TVL, TVL change and TVL time series analytics for DEX liquidity pools • Overall protocol TVL and TVL change over selected time range • Overall protocol swap volume and volume change over selected time range • Supplied and borrowed values, utilization and solvency ratio for money markets. 	Hydration Dashboard
		Moonbeam Dashboard
		Bifrost Dashboard

	<ul style="list-style-type: none">• Overall protocol supplied and borrowed value over selected time range• Overall protocol borrow, repay and liquidation volume over selected time range
